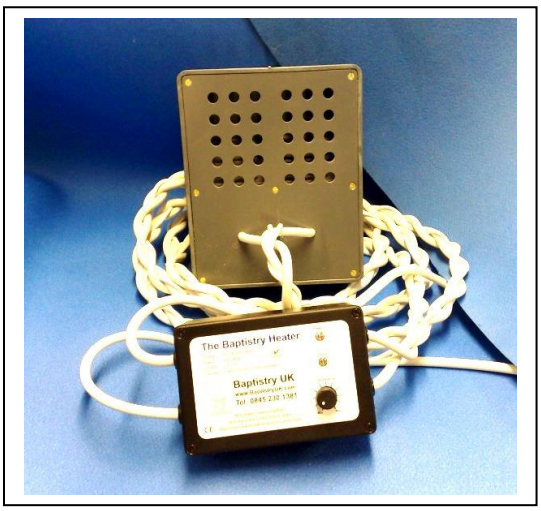
The *BaptistryUK* baptism pool heater – 4.8kW Model

Probably the only purpose built baptistry heater on the market. Designed to heat large baptistries of any depth.



- Two 2.4kW heaters (4.8kW total) to cope with baptistries up to 5000 litres (1100 gals.)
- Built in water sensor for safety*
- Long flex for any depth of baptistry
- Stable and control box kept safely away from water
- Thermostatic control
- Element safely enclosed to prevent damage to liner
- Compact and easily stored
- Simple to use
- Runs off single phase supply with a '*commando*' plug fitting
- Long service: we have heaters out there that are over 10 years old and going strong
- Repair and maintenance service available

Baptistry Heater

Technical information:

Two 2.4 KW heating elements (i.e. total 4.8kW). The heater has single flex and a 'commando' plug. You will need a 32A socket; an adaptor is not appropriate.
Heating times will vary according to the initial temperature of the water.

The 4.8 Kilowatt heater comprises:

32A Commando plug fitting
6m x PVC covered mains cable
4m x 6 core signal cable
ABS IP20 splash-proof control box containing PCB
Grey PVC perforated heater box (220mm x 170mm x 90mm) containing:
2 x 2.4 kW incoloy 800 elements
1 x liquid level sensor
1 x temperature sensor
with all wiring and connections encapsulated in epoxy potting compound

*Please note. It is imperative that the unit is not switched on outside water. The water sensor cannot be used as an alternative to this. The sensor is only an additional safety precaution.

The Baptistry heater is designed to heat the water in baptistries where a hot water supply is not available.
